DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1, 2, 4-7 are rejected under 35 U.S.C. 103(a) as being unpatentable over Cutler, Jr. et al., US 5,678,184 (Cutler).

Cutler discloses a method of pre-computation of candidate handoff cell list for cellular communications. Specifically, Cutler teaches a method for performing handoff within a mobile communication system, the mobile communication system having at least one first communication device (ISU 26) for communicating with a plurality of second communication devices (SCD) (satellite 12), comprising the steps of transmitting from at least one of the SCDs to the first communication device a handoff list of SCDs to which the first communication device is permitted to handoff when in a system access state. See col. 4, lines 41-45, and col. 8, lines 26-39. Cutler, however, fails to teach the step of transmitting a channel assignment message from each of the SCDs in the handoff list. Cutler teaches, instead, the transmission of the channel identification along with the handoff cell list. In other words, the channel information of each of the cells in the handoff list is sent from the satellite to the ISU. See col. 8, lines 26-39. It would have been obvious for one of ordinary skill in the art at the time of the invention to implement

Art Unit: 2663

the Cutler system by having each of the satellites for the respective cells in the handoff list to send the channel information directly to the ISU instead of having the current satellite prepare the channel information for transmission to the ISU, since it is well known for base stations in neighbor cell to send out information in a pilot channel for the subscribers in the neighboring cell to detect and use.

Double Patenting

3. A rejection based on double patenting of the "same invention" type finds its support in the language of 35 U.S.C. 101 which states that "whoever invents or discovers any new and useful process ... may obtain a patent therefor ..." (Emphasis added). Thus, the term "same invention," in this context, means an invention drawn to identical subject matter. See *Miller v. Eagle Mfg. Co.*, 151 U.S. 186 (1894); *In re Ockert*, 245 F.2d 467, 114 USPQ 330 (CCPA 1957); and *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970).

A statutory type (35 U.S.C. 101) double patenting rejection can be overcome by canceling or amending the conflicting claims so they are no longer coextensive in scope. The filing of a terminal disclaimer cannot overcome a double patenting rejection based upon 35 U.S.C. 101.

4. Claim 3 is rejected under 35 U.S.C. 101 as claiming the same invention as that of claim 1 of prior U.S. Patent No. 6,178,164. This is a double patenting rejection.

5. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Art Unit: 2663

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

6. Claims 1-2, and 4-7 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1 and 13 of U.S. Patent No. 6,178,164. Although the conflicting claims are not identical, they are not patentably distinct from each other because leaving out the limitation of a single controller controlling the all the SCDs in the handoff list would have been an obvious variation of the invention since one of ordinary skill in the art can make variation within the teaching.

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The Garncarz et al. patent, the Olds et al. patent, the Lupien et al. patent, and the Balachandran patent are cited for further references.
